Experience

Freelancer @ Upwork

December 2021 – Present

- Experience working on live/deployed projects coded using python, including automation with selenium and Web scraping.

Personal Projects - Experience

- Recreated Popular, highly used applications to display knowledge of how to recreate certain types of apps or designs.
- Worked using Firebase to Understand Authentication and having a database for users.
- Worked Using MERN stack to have a database of posts stored with MongoDB displayed using react and ran using nodejs with express.
- Worked With Redux within React to manage state and pass context throughout the application- involving reducers and actions.
